

Product Information

Tris SDS Buffer (2.5X) (pH 8.8)

Catalogue Number: GBPTSB01

General Information

The Tris SDS Buffer (2.5X, pH 8.8) is a versatile buffer used for electrophoresis of proteins under denaturing conditions. The presence of SDS ensures protein denaturation, while Tris maintains the required pH during electrophoretic separation. Its 2.5X concentrated format allows for easy preparation of the working solution by simple dilution, ensuring consistent and reproducible results.

Product Specification

Appearance : Clear, colorless solution

Storage & Shelf Life: Store at Room temperature and use within 12 months.

Shipping Conditions: Ambient

pH : 8.8

Concentration : 2.5X

Formulation

Components	Concentration g/ml
Tris base	22.725
SDS (Sodium Dodecyl Sulfate)	1.25

For Research Use Only
